NATURAL ENVIRONMENT RESEARCH COUNCIL

- The **Sea Level Bridging phase** (2018) has allowed a smooth **transition** between SL_cci phase II (2014-2017) and the Sea Level **CCI extension** activities (SL_cci+)
- A **3-year long project** focused on development and production of coastal altimeter sea level products in three specific regions of interest.
- Consortium with a high level of expertise.
- Coastal sea level activities are of interest for public and media. Effort should focus on **communication** (publications, international conferences,...).
- Output of the project should contribute to provide recommendation to ESA regarding the future of CCI+ activities (>2022): Earth system cycles (Water, Energy, Carbon).

Thank you for your contributions!
